Saving money in your business
is our business

business savings experts |

Do you really know how much you spend on your key business costs? In today's busy and challenging environment, businesses often struggle to find the time to focus on how much they spend on their key business costs. That's where we come in. We are an independent consultancy that specialises in reducing business costs in a number of essential expenditure areas, such as Energy, Telecommunications, Insurance and a number of other services. Working on our clients' behalf, our team of trained specialists establish the most competitive deals in the marketplace.

Negotiating contract renewals can be daunting, risky and extremely time-consuming. Not only can we identify savings but we will also take care of all the transfers and paperwork, leaving our clients free to concentrate on the key areas of their business, saving both time and money. In essence, we add real value by:

- Offering a wide portfolio of services
- Securing the best tariffs
- Making no charge for our service*
- Passing on all savings (our clients retain 100% of the savings)*
- Providing a full on-going support service

We work with a range of clients from privately owned businesses and organisations to large PLCs. What we do is very simple – a no obligation FREE 'health check' of their essential overheads. So whether they are a single or a multi-site business or organisation, we will be able to establish the best deals and what's more, handle all the contracts.

All we need are copies of the bills or relative information for the services to be reviewed along with a signed Letter of Authority (required under the Data Protection Act). We will obtain all the supply or contract information and, when appropriate, tender the supply service to obtain the most competitive and suitable rates and provide a quote analysis or report showing the savings. Once approved, we will complete all the necessary paperwork and ensure that the contract transfers smoothly on the due date.

We pride ourselves on our communication and transparency and, have designed an online portal specifically for our clients, so that they can have access to all of their records at a glance. We also provide a full on-going support service, with dedicated Support Managers on hand to answer any questions and to ensure that any issues should they arise, are dealt with promptly and efficiently.

9/10

Clients save money.

why use business savings experts? |

We liaise with suppliers to manage and resolve supplier issues

As Business Savings Experts, we place 100s of contracts each month with our supplier network, giving us access to the management levels of suppliers, who have the ability to solve issues rapidly.

One point of contact

Communication is key and we believe it's important to have one person that you can contact for help and advice. Every client has a dedicated Support Manager who they can contact as and when necessary.

Fully managed services

Generally, suppliers terms and conditions can be complicated, with specific processes to complete at the end of the contract. Failure to terminate within a specific timeframe could result in substantially increased rates. At Business Savings Experts we manage the whole process, relieving any unnecessary stress.

Bill validation

Our Support Managers can validate energy, telecoms and water bills and challenge suppliers over mistakes and mis-billing, giving clients that extra peace of mind, that their invoice is a true and accurate bill of their consumption.

Competitive pricing

Managing portfolios can be both time consuming and complicated. Our experience means that we can identify the most competitive suppliers for each service in different regions ensuring that clients take advantage of the most competitive rates available.

To add value to your business, and to find out how you can start to enjoy cost savings, talk to us today.
